स्वच्छ भारत अभियान
Swachh Bharat Mission
Date of Report : 10th October, 2014

Venue : ICAR-Directorate of Research on Women in Agriculture, Bhubaneswar

All the scientists & technical staff members were briefed about the plans to mitigate the effect of cyclone on the cleanliness and health of the farm families in the villages. The farmwomen in the adopted villages of the Directorate in the Odisha State have been sensitized about the steps to be taken for cleanliness in the villages, especially in view of the ensuing cyclone (HudHud) warning and suggested the following measures:

- Storage of Dry rations (like instant energy food like Jaggery, Chana, Flattened rice, milk powder, etc.) in clean and hygienic conditions.
- Keeping sufficient clean drinking water for at least 2-3 days, to avoid diarrhea, especially in the children.
- First-aid items, ORS and emergency medicines in small water proof packets may be kept handy.
- Keeping the values, land records and other important documents safely and handy.

At the Directorate, the contingency plan has been prepared for providing drinking water to office and residential campus. Steps were taken to restore the power failure, if any, within minimum possible time.
